They can be very difficult to see, but line them up by turning the engine The final alignment most likely will need to be done by turning the engine with a wrench.. If your pump has high hours - you can assume it will need a few more parts than just the seal kit - if you want to replace them while apart.. I had to fix many - out in the woods and field when I was a Deere mechanic A person with experience can pull the pump all apart, reseal and put back together - in one hour.
